1

## Run tests on your site

Enter your site's URL to see how well it performs across all audits.

2

## Look at what matters

See your site's performance across the areas you care about.

3

## Get tips for improving

Each test comes with helpful steps to improve your site's results.

# How your site is measured

When you measure your site, web.dev uses [Lighthouse](#), an open-source, automated tool for improving the quality of web pages. Lighthouse will audit your site in the following categories:

### Performance

Audits for metrics like first paint and time to interactive to determine lag.

### Best Practices

Looks for everything from HTTPS usage to correct image aspect ratios.

## SEO

Checks for best practices to ensure your site is discoverable.

## Accessibility

Checks for common issues that may prevent users from accessing your content.

All tests are run using a simulated mobile device, throttled to a fast 3G network & 4x CPU slowdown.
